New Hallingford - 3 Door Sliding Robe

Assembly Instructions Please keep for future reference

Dimensions
Width - 174.6cm
Depth - 60.3cm
Height - 205.7cm

Tip: To prevent damage, we recommend that you build your unit on the carton(s) it was packed in.

Important – Please read these instructions fully before starting assembly

If you need help or have damaged or missing parts, please visit: [www.argos-support.co.uk](http://www.argos-support.co.uk) or email: Help@ClickSpares.co.uk (quoting your original order number)
Alternatively, call the Spares Helpline on: 0370 112 1928
For any other queries please contact the Customer Helpline on: 0345 640 2020

Issue 4 - 02-03-2016
Safety and Care Advice

Important – Please read these instructions fully before starting assembly

• Check you have all the components and tools listed on pages 2 and 3.
• Remove all fittings from the plastic bags and separate them into their groups.
• Keep children and animals away from the work area, small parts could choke if swallowed.
• Make sure you have enough space to layout the parts before starting.

• To reduce the likelihood of damaging your product please ensure that your power drill is set on a low torque setting
• Do not stand or put weight on the product, this could cause damage.
• Assemble the item as close to its final position (in the same room) as possible.
• Assemble on a soft level surface to avoid damaging the unit or your floor.
• Parts of the assembly will be easier with 2 people.

Care and maintenance

• Only clean using a damp cloth and mild detergent, do no use bleach or abrasive cleaners.
• From time to time check that there are no loose screws on this unit.
• This product should not be discarded with household waste. Take to your local authority waste disposal centre.

Instruction video

• This manual is provided with an additional instruction video. If the icon on the right is displayed at a particular step in the manual, Follow the link: http://nlink.nu/homeretail1
Or scan the QR code on the left with your phone.

Note: if required the next page can be cut out and used as reference throughout the assembly. Keep this page with these instructions for future reference.
## Components - Panels

Please check you have all the panels listed below

### Tools required

- Phillips screwdriver (medium & large)
- Flatblade screwdriver (medium)
- Piercer (small)
- 5mm Suitable drill bit
- 2.5mm Suitable drill bit
- Drill
- Stairs
- Ruler/tape measure
- Scissors
- Eye protection (when using a hammer or drill)
- Small hammer
- Spirit level
- Setsquare
- Hanger rail support x 4

**Ruler- Use this ruler to help correctly identify the screws**
Assembly Instructions

Step 1

Insert fittings

**a:** Attach hanger rail support [M] using 12.5mm screw [F] onto upright [3].

*Flip panel*

**b:** Attach hanger rail support [M] using 12.5mm screw [F] onto upright [3].

Screw locking screw [H] into upright [3].

*Note:* locking screw [H] as far as shown. Do not over tighten.

Step 2

Attaching panel

Position large horizontal onto upright [3].

Use a screwdriver to turn twister cams [1] clockwise to lock.

---

Locate the ‘mating’ panel over the Cam Leg.

Insert the Cam so the longer ‘slot’ is pointing towards the Cam Leg.

Use a Flat Bladed Screwdriver to turn Cam clockwise as far as it will go.

The final ‘locked’ position will be more than half a turn.
Assembly Instructions

Step 3

Insert fittings

a: Insert expando housings B into top 6.

Flip panel

b: Carefully knock sliding rail W into top 6 by using a hammer.

c: Insert locking screw H into top 6.

Repeat b and c for bottom 7.
Step 4
Attaching panel
Position top 6 onto upright 3.
Insert twister cam 1 into upright 3 where shown.
Use a screwdriver to turn twister cam 1 clockwise to lock.

Step 5
Attaching plinths
Align the sides of plinth front 12 with bottom 7 as shown and attach using chipboardscrew A.
Note: there are no predrilled holes for 40mm screws A.
Repeat with plinth back 13.

Step 6
Attaching panel
Position bottom 7 onto upright 3.
Insert twister cam 1 into upright 3 where shown.
Use a screwdriver to turn twister cam 1 clockwise to lock.
**Assembly Instructions**

**Step 7**

Insert fittings

Screw locking screw $H$ into right side $2$ where shown.

*Note:* Insert locking screw $H$ as far as shown. Do not overtighten.

Attach hanger rail support $M$ using pozi screw $F$ onto right side.

Insert shelf supports $N$ where shown.

**Step 8**

Attaching panel

Position right side $2$ onto top $6$ and bottom $7$.

Insert twister cam $1$ into top $6$ and bottom $7$ where shown.

Use a screwdriver to turn locking nuts $I$ clockwise to lock.

**Step 9**

Insert fittings

Screw locking screw $H$ into left side $1$ where shown.

*Note:* Insert locking screw $H$ as far as shown. Do not overtighten.

Attach hanger rail support $M$ using pozi screw $F$ onto right side.
Assembly Instructions

Step 10

Attaching panel

Position left side 1 onto top 6, large horizontal 8 and bottom 7. Insert twister cam 1 into top 6, large horizontal 8 and bottom 7 where shown.

Use a screwdriver to turn locking nuts 1 clockwise to lock.

Step 11

Fitting back panels

Important!
Cabinet MUST be ‘square’ before back is attached.

Attach back 9 and foldy back 10 to back of wardrobe with the coloured surface facing the inside of the unit using nails 2 and backpanel-screws 3.

Nails 2 should be spaced about 150mm apart.

A:A = B:B ✔️

See page 2 for link to instruction video!
Step 12

Align the unit

Stand up the unit

Use a spirit level to check if the base of this unit is level front-to-back\(^1\), side-to-side\(^2\) and top-to-bottom\(^3\) in the three positions shown.

Use pegs \(S\) to level your unit in all three directions shown. Knock peg \(S\) in, as far as you require, under the ends of the unit and then snap off peg flush with the panel.
Step 13

Insert shelf

Position shelf 5 onto shelf supports N and fix by screwing four chipsboard-screws O through shelf supports N into shelf 5.

Step 14

Inserting hanger rails

Place hanger rails 1 and 2 onto hanger rail supports M.
Assembly Instructions

GLASS handle with care

Step 15
Insert fittings

Stick felts Q onto mirror slide door 11 where shown.

Insert Sliding door rollers L in mirror slide door 11 on the side which is flush with the handle mouldings T.

Insert sliding door guides K on the other end of the mirror slide door 11.

Step 16
Fitting handle to door

Hold hande mouldings T up against front of mirror slide door 11 make sure the ends are flush with one end of the mirror slide door 11.

Screw screws E into the 'V' groove of the handle moulding T.

Tip: start with the endscrews, then the centre screw and finally the other screws.

Step 17
Fitting handle to door

Hold hande mouldings T up against front of slide door 4 make sure the ends are flush with one end of the slide door 4.

Screw screws E into the 'V' groove of the handle moulding T.

Tip: start with the endscrews, then the centre screw and finally the other screws.

See page 2 for link to instruction video!
Assembly Instructions

Step 18

Insert fittings

Insert Sliding door rollers in slide doors on the side of the handle mouldings on the end which is flush with the handle mouldings.

Insert sliding door roller adjustables in slide door on the other side, fix them with backpannel screws.

Insert sliding door guides on the other end of the slide door.

This will be the Right Hand Door

This will be the Left Hand Door

Step 19

Fitting of the doors

Important!

Double check if the unit is level before fitting the doors. If this is not the case please go back to step 12.

Fit slide doors into the rear track.

Fit mirror slide door into the front track.

See diagrams for more information about the fitting of the doors.

To fit the top of the Doors

The switch in the top glides must be in this position prior to fitting the top of the Doors.

When the top of the Door is in position, press the switch to push lug into the groove of the track.

To fit the bottom of the Doors

This lug fits into the groove in the track

This lug fits into the groove in the track
Step 20

Insert fittings
Screw expanding dowel C into plinth top 14.

Step 21

Attaching plinth
Position the plinth top 14 above the unit and slot expanding dowels C into the expando housing B. The top of the plinth top 14 must be flush with the top of the unit.

Turn the screws in the expando housings B as far as they will go.

Step 22

Attaching pelmet
Position the pelmet 15 above the unit drilling-holes and turn the screws A as far as they will go.

See page 2 for link to instruction video!
**Step 23**

**Attaching L-bracket**

Position L-Bracket \( G \) onto top \( 6 \) as shown, fix by using 15mm screw \( D \).

**Note:** there are no pre-drilled holes for 15mm screw \( D \).

Use \( X \) to fix on the wall, please see last page for more information.

**Step 24**

**Attaching door-stops**

Stick 2 door-stops \( R \) onto the outside edge of each plain door to act as buffers between the doors and side panels.
Level & square the unit

Level & square the unit up:
Knock the pegs S as far as you require, under the ends of the unit and then snap off flush with the panel.

For more detailed information see step 12.

Raise the door

To raise the door, loosen the screws and swivel the glide towards the ‘+’ arrow.

Re-tighten the screws.

Lower the door

To lower the door, loosen the screws and swivel the glide towards the ‘-’ arrow.

Re-tighten the screws.
Important note:

If plastic wall plugs are supplied with your product:

- these are only suitable for use in masonry walls.

If you are in any doubt about the correct wall plugs for your wall, seek professional advice.

Failure of the product due to using incorrect fixings is the responsibility of the installer.

Important: When drilling into walls always check that there are no hidden wires or pipes etc.

Make sure that the screws and wall plugs being used are suitable for supporting your unit. Consult a qualified tradesperson if you are unsure.

Hints:

1: General rule: Always use a larger screw and wall plug if you are not sure.
2: Ensure you use the recommended drill bit to match the wall plug and hole size.
3: Ensure you drill the hole horizontally, do not force the drill or enlarge the hole.
4: Take extra care when drilling high walls, ceilings and ceramic tiles. Ensure wall plugs are inserted beyond the thickness of the ceramic tiles to avoid the tiles splitting or cracking.
5: Ensure wall plugs are well fitted and are a tight fit in the drilled hole.

Types of walls

You can use one of the following types of wall plug if your walls are made of brick, breeze block, concrete, stone or wood.

No.1 “General Purpose” wall plug

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, general purpose wall plugs can be used.

No.2 “Plasterboard” wall plug

For use when attaching light loads on to plasterboard partitions.

No.3 “Cavity Fixing” wall plug

For use with plasterboard partitions or hollow wooden doors.

No.4 “Cavity Fixing-Heavy Duty” wall plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

No.5 “Hammer Fixing” wall plug

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

No.6 “Shield Anchor” wall plug

Heavy loads

For use with heavier loads such as TV & HiFi speakers and satellite dishes etc.

Safety & Maintenance

Safety: Always check the fitting and location to ensure your safety in and around the home.

Fitting: From time to time check the fitting to ensure the wall plugs or screws do not become loose.
